# Origo Integration Hub

Our Integration Hub connects the market, making the business of integration quicker, easier, and more cost-efficient than ever.

Without the Integration Hub, organisations have to integrate point-to-point with each individual counterparty to enable their systems to talk to one another. This matrix of integrations is expensive to build and maintain, not to mention complex to manage.

## Connect once to our Hub, deploy to many

Our Integration Hub sits in-between platforms and adviser software suppliers, providing benefits such as:

Significantly improved integrations between organisations - removing complexity and additional maintenance.

Simplified integration with trading partners. Removing the need to undertake a new IT build each time.

Simplified integration process. By supporting many different data formats, the Integration Hub helps reduce risk and complexity.

Extended market reach. Regardless of company size, send and receive data to and from any organisation using the Hub.

Re-engineer existing integration points to immediately help to reduce costs.

One contract covers all connections.
