# Email security demands your attention

Securing your organisation’s email communications has never been more important. Financial Services businesses have a duty of care that extends beyond pure legal and compliance requirements to secure their clients’ information.

With increased client awareness of security risks and increasing demands on advisers to meet industry regulatory and compliance requirements, now is the time to use Unipass Maillock to protect your business.

## What can Unipass Maillock do for you?

Unipass Maillock is an encrypted email service, which is simple to use and focused on you and your clients’ needs. In a couple of clicks you can secure your emails, protect your clients and mitigate risk.

For the richest functionality & best user experience, download our Outlook add-in.

### Key features & benefits

-  Integration with Unipass Identity so you can easily open your secure emails and use your own email address, domains and Exchange servers.
-  Recall function if an email is accidentally sent to the wrong recipient.
-  Military Grade Encryption to protect your emails in transit.
-  Compatible with 32 and 64-bit Outlook.\*
-  A full audit trail allowing you to verify when a secure email and any attachments have been opened by the intended recipient, enabling your organisation to meet MIFID II requirements.\*
-  You can brand your secure emails so your clients can easily recognise your emails and trust they are from your organisation.
-  Access your own Admin Console enabling you to manage individuals within your organisation and set up trigger words.
-  Successfully authenticated recipients are added to the sender’s trusted community and future challenge questions are optional.
-  Operational savings by reducing print and postage costs and lowering your carbon footprint.
